

IT Asset Assessment Service

The **IT Asset Assessment Service** from The **W** Group is a comprehensive analysis of all IT Assets within the enterprise, with a focus on identifying potential cost savings and reducing risk. This service provides fast, accurate, and reliable results through the use of proven technology and industry best-practices. The final output contains highly valuable information that can be used to reduce cost and risk associated with the ownership of IT assets.

OUR PROCESS

The **W** Group uses proven processes and senior-level resources to give you a complete picture of your IT assets, and help you to develop cost-savings and risk-reduction plans, customized to your business.

** Example engagement shown. Time and effort will vary.*

COST SAVINGS

The **W** Group's **IT Asset Assessment Service** provides in-depth analysis of your current IT assets and the associated IT spend to identify significant cost savings. Our deliverables include a detailed plan that you can use to reduce your annual spend on your IT assets. Our vendor-specific expertise allows us to identify creative ways to save money by exploiting software licensing metrics, identifying better license packages, consolidating or virtualizing hardware, reducing maintenance, and improving your IT contracts. We can also provide analysis on your vendor management and strategic sourcing practices.

REDUCING RISK

The **W** Group has on-staff experts in software license compliance. Our **IT Asset Assessment Service** includes a complete overview of the license entitlements that you own, and a deep-dive analysis of your vendor software contracts to help you identify license compliance exposures before they become an issue. Our services are fast and efficient, giving us the ability to respond to urgent compliance matters.
